Professional Summary

Software Developer with solid experience in Full-Stack development, covering Web and Mobile applications. Specialist in the Python ecosystem, Flutter, and JavaScript/TypeScript technologies (React/Node.js). Fellow and Cadet at 42Luanda, with a strong command of low-level computing fundamentals (C/C++). Focused on creating responsive interfaces, scalable architectures, and clean code, applying SOLID principles and Design Patterns to deliver high-performance solutions in distributed systems.

Skills

Languages	JavaScript, TypeScript, Dart, Python, C, C++, SQL, Ruby
Frontend/Mobile	React, Next.js, Flutter, Tailwind CSS, HTML5, CSS3
Backend	Node.js, FastAPI, Django, Ruby on Rails, Flask
Systems & Data	PostgreSQL, Firebase, Redis, Kafka, Clickhouse, MongoDB
Infra & Tools	Docker, Git, CI/CD, Linux/Unix, REST APIs, TDD

Professional Experience

- Jan 2024 – **Software Developer (Freelance)**, *Independent Projects*, Remote
- Present
- **Full-Stack Development:** Created dynamic web applications using React and TypeScript, integrating modern front-ends with robust back-ends in Node.js or Python.
 - **Mobile Solutions:** Developed cross-platform applications with Flutter, ensuring native performance and intuitive user interfaces for Android and iOS.
 - **Architecture & Events:** Implemented data pipelines and asynchronous communication to improve the scalability of third-party systems.
 - **System Optimization:** Technical consultancy for database performance improvement and code refactoring following industry best practices.
- Jan 2023 – **Fullstack Developer**, *AcademiaLB*, Luanda, Angola
- Present
- **Product Development:** Technical leadership in developing end-to-end features, from Figma prototyping to implementation with modern web and mobile technologies.
 - **API Design:** Developed high-performance RESTful APIs using FastAPI, managing complex data flows for e-commerce and education services.
 - **Data Integration:** Optimized PostgreSQL databases and integrated cloud services, resulting in a significant reduction in application latency.
 - **Evolutionary Maintenance:** Responsible for the technological update of legacy platforms to modern frameworks, ensuring security and scalability.

Jan 2022 – **Software Engineering Cadet**, 42Luanda, Luanda, Angola

- Present
- **Intensive Training (Cadet):** Developed complex projects in C/C++, including the creation of a functional Unix Shell and memory management libraries (malloc/free).
 - **Problem Solving:** Mastery of advanced algorithms and data structures through project-based learning and peer evaluation.
 - **Peer Review:** Conducted technical code reviews for over 100 projects, ensuring architectural quality and adherence to SOLID standards.

Key Projects

Mapazzz An innovative malaria prevention application that allows users to map and track mosquito breeding sites in their area. The project leverages **Flutter, Firebase, and OpenStreetMap** to create a life-saving tool for community health. (Hackathon Winner).

Moburger App A comprehensive mobile application built with **Flutter** for ordering and managing burger deliveries. Features include user authentication, menu browsing, custom burger creation, order placement, and real-time order tracking with **Firebase** backend integration.

Education

2017–2021 **Bachelor of Architecture**, *Namibia University of Science and Technology*, Windhoek, Namibia
